

0.2 micron makes all the difference.

How fine is 0.2 micron? A strand of hair is typically 1 micron thick so you can imagine how fine 0.2 micron is! That's how superior Pharmasafe Multi-Purpose Solution is because it's manufactured with industry-leading 0.2 micron sterile filtration to provide you a purer, safer and superior choice. More importantly, contact lens users who use Pharmasafe Multi-Purpose Solution experience significantly longer periods of comfort—thanks to MoistureRICH™, our unique formulation for unmatched all-day comfort. Try it and feel the difference!

pharmasafe™ ISO-CERTIFIED | CE-CERTIFIED

Available at all leading pharmacies and optical outlets.

Premium Grade Multi-Purpose Solution
For All Soft And Disposable Contact Lenses

All-Day Comfort Without Compromise

Quick Facts

- 1** Pharmasafe™ Premium Grade Multi-Purpose Solution safely cleans, disinfects and stores your contact lenses in one step! It contains MoistureRICH™, a unique formulation that helps your lenses retain moisture and stay lubricated all day long—enjoy noticeable relief from dryness and irritation!
- 2** Pharmasafe™ Premium Grade Multi-Purpose Solution's no-rub formula makes it easier to keep your lenses clean—simply remove, rinse and store your lenses in our superior solution and let the magic of its anti-microbial action go to work!
- 3** Pharmasafe™ Premium Grade Multi-Purpose Solution has a natural pH similar to tears and is proven safe and gentle to your eyes.
- 4** Pharmasafe™ Premium Grade Multi-Purpose Solution is available in 140ml and 360ml sizes. Enjoy great savings with our special value packs!

About Pharmasafe™

All Pharmasafe™ products are developed in our own research and development facility by internationally acknowledged experts in ophthalmology and microbiology. We manufacture and bottle our products in our own state-of-the-art clean room facility to ensure we meet the highest health standards. With Conformité Européenne (CE), ISO 13485:2003 and ISO 9001:2003 certifications, our world-class products comply with the highest international contact lens care standards. Our 0.2 micron sterile filtration, superior to the industry's filtration standard of 0.45 micron, provides you a purer and safer solution. Pharmasafe Laboratories offers a line of premium grade contact lens care products since 1995, each formulated to give you maximum care and comfort.
